

Cedar

- Perfect for grouts, corners, windows, and walls
- Can be used with a microfiber pad or a microfiber cloth
- Tip of base is designed for getting into grout lines as well as utilizing as a squeegee for heavy spills
- Curved design allows for tight fit into corners and along base cove

Cedar enhances old time cleaning methods with innovative features to provide a multi-purpose tool for most surface cleaning applications.

The U-shaped design increases surface pressure and helps remove all forms of dirt and soil.

Cedar comes with a locking stem to hold frame in position in order to clean overhead surfaces. It will automatically unlock in the case of a hard impact to prevent the frame from getting damage.

The base frame has a special design edge which works great in grout lines, to help with agitation and scuff removal.

The hook and loop strips and push clips allows for either a microfiber pad or standard microfiber cloth.

Features and Benefits

- Perfect for grouts, corners, windows, and walls
- Can be used with a microfiber pad or a microfiber cloth
- Tip of base is designed for getting into grout lines as well as utilizing as a squeegee for heavy spills
