

Oak-Mini Frame

- Perfect for robust cleaning applications
- Light Aluminium frame
- Locking stem feature for directional cleaning
- Interchangeable spare parts

The Oak-Mini Frame uses high-quality components to ensure extended performance in any commercial cleaning program.

The locking stem is rugged at the joint and allows for 360° rotation when assembled to the handle. It comes with a lock feature which will allow for directional cleaning when needed, including high surfaces such as walls, windows and ceiling areas.

Features and Benefits

- Perfect for robust cleaning applications
- Light Aluminium frame. Can be custom sized to fit program requirements
- Trapezoid frame design provides easier access into corners and along baseboards
- Removable end caps allow for hook and loop strip replacement
- Smooth rounded edges help prevent any damage to sensitive areas such as wood trim or wooden furniture legs
- Locking stem feature for directional cleaning
- Interchangeable spare parts
- Quick Connect system to easily attach other accessories in our range
