

Spruce Frame

- Perfect for mopping, sweeping or squeegeeing surfaces
- Reduces the need for extra tools in the cleaning cart
- Frame attaches to most hook and loop backed microfiber pads
- Currently available in two sizes 10.0" and 16.0"
- Quick Connect system to easily attach other accessories in our range
- Universal locking features adapt to most tools with a snap-on design

The Spruce Frame is a multi-purpose tool. With a simple click the frame converts from being a flat based frame for mopping to a broom or a squeegee.

The frame edges use high quality TPE molded material which provides long lasting action and reduces wear. The engineered stem allows for a "Lock-N" action which holds the frame in an upright position while sweeping or clearing liquid spills. The only frame of its kind with 180° swivel when in "broom" or "squeegee" position, allowing the use of "S" or "Figure 8" cleaning motions.

Features and Benefits

- Perfect for mopping, sweeping or squeegeeing surfaces
- Reduces the need for extra tools in the cleaning cart
- Frame attaches to most hook and loop backed microfiber pads
- Currently available in two sizes 10.0" and 16.0"
- Quick Connect system to easily attach other accessories in our range
- Universal locking features adapt to most tools with a snap-on design
